# UNICE BONDOC

## Founder & Product Engineer | AI & Full-Stack Software

Sydney, Australia | uniceabondoc@gmail.com

unicebondoc.com | linkedin.com/in/unicebondoc | github.com/unicebondoc

## PROFILE

Product engineer and founder of ONQST, building AI-powered applications, shared-home software and interactive web experiences. Hands-on across product design, React interfaces, Python APIs, AI integration and testing. Combines a Master of ICT with banking operations experience and practical work in e-commerce.

## CURRENT EXPERIENCE

### Founder & Product Engineer - ONQST

Mar 2026 - Present

Independent business developing software products and interactive experiences.

- Define product scope, design interfaces and implement applications from early concepts through testing and release preparation.

## SELECTED PRODUCT WORK

### What Was Drawn - AI Oracle-Card App

Public web experience

A web app where people draw oracle cards using hand gestures and receive AI-generated interpretations grounded in the card material.

- Integrated webcam hand tracking with a React interface and a Python/FastAPI backend using retrieval-augmented generation (RAG).
- Added tap controls so mobile visitors and people without camera access can use the reading flow.
- Migrated the production billing API from Railway to AWS Lambda and API Gateway, preserving the public domain with encrypted configuration and infrastructure-as-code deployment.

React, MediaPipe, Python, FastAPI, LangChain, Pinecone, OpenAI, AWS Lambda, API Gateway | whatwasdrawn.com

### FlatSync - Shared-Household App

In testing

An app that helps housemates coordinate chores, shopping lists and shared bills.

- Built household invitations, member permissions, bill splitting and payment confirmation, with shared updates across members.
- Prepared iOS and Android test builds; added regression tests for bill calculations, conflicting edits and keyboard-accessible interactions.

React, TypeScript, Capacitor, Supabase, PostgreSQL

### Core Memories - Interactive 3D Portfolio

Public web experience

An explorable forest where visitors discover my work and career story through interactive memory orbs.

- Built the 3D environment, animated orbs, shader effects and an AI-assisted portfolio guide.
- Added a conventional project overview and direct CV/contact paths for visitors who prefer not to explore the 3D experience.

React, JavaScript/JSX, Three.js, React Three Fiber, WebGL, GLSL | unicebondoc.com

## CORE TECHNICAL SKILLS

**Application development:** JavaScript, TypeScript, React, Next.js, Python, FastAPI, REST APIs, SQL, Supabase, PostgreSQL.

**AI, cloud & delivery:** RAG, OpenAI integration, LangChain, Pinecone, MediaPipe, AWS Lambda, API Gateway, CloudFormation/SAM, SSM, Git, Vitest, Docker, Vercel.

# UNICE BONDOC

Team projects, business operations and professional background

## TEAM & BUSINESS CONTRIBUTIONS

### CauseConnect - Developer / Programmer

ACS internship | Team of 10
Jul 2026 - Present

A team-built web application for discovering and exploring social-awareness campaigns.

- Implemented campaign homepage and detail views, integrating the team's API and handling routing, response mapping and missing campaign data.
- Added regression tests and setup documentation; collaborated with backend and authentication teammates on integration reviews.

React, JavaScript, REST APIs, Vitest, Git | Expected completion: Oct 2026

### UNIKRE - Commerce & Operations

Software & business operations

A commerce business selling the Quiet Whiskers Oracle physical card deck.

- Built the brand and commerce website, connecting product information with the companion digital experience and marketplace purchase links.
- Support listings, marketing preparation, order fulfilment and product-cost review alongside the technical work.

Next.js, React, TypeScript, Three.js | unikre.com.au

### Ninja Clan / Hermes - Personal Automation

Private system | Mac-hosted

A personal automation system connecting task management, calendar, messaging and project knowledge.

- Configured integrations and workflows across TickTick, Google Calendar, Telegram and Obsidian, with human approval for consequential actions.
- Migrated the Hermes runtime from earlier Linux/VPS infrastructure to macOS and retired the VPS.

Python, Hermes, macOS, launchd, APIs

## EARLIER EXPERIENCE

### Software Engineer - UNIKRE Trading

Nov 2024 - Jan 2025 | Sydney

Western Sydney University capstone engagement focused on AI-generated e-commerce content.

- Compared AI-generated and human-written storefront content using Python-based analysis to evaluate its use in a Shopify commerce setting.

### SME Account & Loan Operations Manager - RCBC

Sep 2019 - Sep 2022
Philippines

- Coordinated small-business account and loan operations across relationship managers, compliance teams, documentation and external stakeholders.

## EDUCATION

**Master of Information and Communications Technology**
Western Sydney University | 2023 - 2025

**Professional Year (ICT), ACS Accredited**
Performance Education | In progress

**Bachelor of Communication (Broadcasting)**
Bicol University, Philippines | 2012 - 2016
