

UNICE BONDOC

AI Engineer | Full-Stack AI Developer | LLM Integration

0492 918 530 | uniceabondoc@gmail.com | Sydney, NSW

linkedin.com/in/unicebondoc | unicebondoc.com | github.com/unicebondoc

SUMMARY

AI Engineer specialising in LLM integration, RAG pipelines, and full-stack AI product development. Built and deployed three live systems: a gesture-based oracle platform using MediaPipe + LangChain + Pinecone, a 3D WebGL portfolio with an OpenAI chatbot, and a Telegram AI assistant with local LLM inference. Master of ICT graduate (Western Sydney University) with a High Distinction (88/100) in postgraduate research on LLMs for e-commerce.

PROJECT PORTFOLIO

What Was Drawn — Gesture-Based AI Oracle Card Platform (2026)

Stack: React, Vite, Tailwind CSS, MediaPipe Hands, FastAPI, OpenAI API, LangChain, Pinecone, Docker, Vercel, Railway

whatwasdrawn.com | github.com/unicebondoc/whatwasdrawn

- Built and deployed a full-stack gesture-controlled oracle card web app where users draw cards using real-time hand tracking via webcam — fully gesture-driven UX with no clicks required.
- Integrated OpenAI API for personalised reading generation, LangChain for prompt orchestration, and Pinecone for vector-based card retrieval through a full Retrieval-Augmented Generation (RAG) pipeline.
- Containerised FastAPI backend with Docker, deployed to Railway; React frontend deployed to Vercel with custom domain; includes per-IP rate limiting and Ko-fi reading-limit monetisation.

Core Memories — Interactive 3D AI Portfolio (2026)

Stack: React 18, Three.js, React Three Fiber, WebGL, GLSL, TypeScript, OpenAI API, Node.js

unicebondoc.com

- Built and deployed a 3D interactive web application featuring a bioluminescent forest environment with animated WebGL memory orbs, particle systems, and GLSL shader effects.
- Integrated an OpenAI-powered AI chatbot enabling real-time natural language interaction with portfolio content, including mobile-responsive design and ambient audio.

Ninja Butler — AI Personal Assistant (2026)

Stack: Python, OpenAI API, LangChain, Telegram Bot API, LLaMA, Qwen (Ollama), Notion API, TickTick API

github.com/unicebondoc/ninja-butler

- Built a conversational AI personal assistant on Telegram — managing tasks, diary entries, calendar reminders, and daily briefings through natural language via a LangChain tool-routing architecture.
- Integrated weather lookups, web search, GitHub queries, Notion sync, and TickTick task management as callable tools through a unified agent framework.
- Engineered dual-mode LLM inference: cloud-based (OpenAI) and locally deployed (LLaMA, Qwen via Ollama) for private, offline-capable AI execution.

LLMs for E-Commerce Content Generation — WSU Research

Jul 2024 – Jul 2025

Stack: Python, OpenAI API (GPT-4), Shopify Liquid, REST APIs, Voiceflow, pandas, numpy, matplotlib

github.com/unicebondoc/llm-ecommerce-analysis

- Conducted empirical A/B testing research comparing AI-generated vs human-generated e-commerce content on a live Shopify platform — measuring page views, CTR, bounce rate, and time on page using Python (pandas, numpy, matplotlib). Awarded High Distinction (88/100).
- Engineered a full-stack Shopify prototype with a custom GPT-4-powered AI chatbot (Voiceflow) as an individual Masters capstone at Western Sydney University.

EXPERIENCE

AI Software Engineer (Freelance)

Jun 2024 – Present

UNIKRE Trading — Sydney, Australia

- Designed and deployed an AI-powered customer service chatbot using Python, OpenAI API (GPT-4), and Voiceflow on a live Shopify store — independently scoping requirements and owning full delivery.
- Built a Shopify e-commerce store from scratch: Liquid theme customisation, RESTful API integration, UI design, product catalogue, and checkout flow.
- Benchmarked GPT-4, Claude, Gemini, and LLaMA for response quality, latency, and cost — producing a comparative analysis that informed the final AI toolchain selection.
- Engagement subsequently recognised by Western Sydney University as the official Masters of ICT industry placement.

SME Account & Loan Operations Manager — RCBC

Sep 2019 – Sep 2022

Rizal Commercial Banking Corporation — Philippines

- Managed end-to-end account operations for 100+ concurrent SME client accounts, coordinating relationship managers, compliance teams, and external stakeholders under regulatory requirements.
- Provided direct client-facing consultations and issue resolution for SME business owners, managing cross-functional communication across banking operations.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

AI & LLMs: OpenAI API (GPT-4), Claude API, Gemini API, LLaMA/Qwen (local via Ollama), LangChain, RAG, Pinecone, Prompt Engineering

Frameworks: React 18, Three.js, React Three Fiber, WebGL/GLSL, Node.js, FastAPI, Vite, Tailwind CSS

Computer Vision: MediaPipe Hands, real-time gesture recognition, hand landmark detection

Deployment & Tools: Docker, Vercel, Railway, Git, GitHub, REST APIs, MongoDB, Telegram Bot API, VS Code, Cursor AI IDE

Cloud: AWS (EC2, S3, deployment basics), Azure (Azure OpenAI, Cognitive Services)

EDUCATION

Master of ICT (Web & Mobile Computing)

Jul 2023 – Jul 2025

Western Sydney University, Sydney

High Distinction (88/100) — Postgraduate Project A (Capstone): LLMs for E-Commerce Content Generation

Key Subjects: IT Project Management, Cloud Computing, Applied Cybersecurity, Web Technologies, Mobile Computing

Bachelor of Communication (Broadcasting)

2012 – 2016

Bicol University, Philippines

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Microsoft Azure AI Fundamentals (AI-900) — *In Progress*
- ICT Professional Year Program (ACS Accredited) — Performance Education, Sep 2025 – Oct 2026
- AWS Cloud Foundations — Amazon Web Services, 2025
