

UNICE BONDOC

AI Engineer | Mobile & Full-Stack Developer | LLM, Agent & Game Systems

Sydney, NSW | Full Work Rights | 0492 918 530 | uniceabondoc@gmail.com
linkedin.com/in/unicebondoc | github.com/unicebondoc | unicebondoc.com

SUMMARY

AI engineer and full-stack mobile builder with a Master of ICT from Western Sydney University (High Distinction on capstone research: LLMs for E-Commerce Content Generation) and a delivery portfolio across RAG products, multi-agent orchestration, AI workflow automation, computer vision, content generation, Unity mobile game development, and self-hosted production infrastructure. Ships public web products (live at whatwasdrawn.com and unicebondoc.com), private agent systems, mobile games, and PropTech automation as a registered sole trader. Former banking operations manager with 100+ SME client accounts, bringing stakeholder discipline and operational rigour into technical builds.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, SQL, Dart, HTML5, CSS3

Backend / Automation: FastAPI, Node.js, n8n, Supabase, PostgreSQL, Twilio WhatsApp, Telegram/Discord bots, Notion API, REST APIs

Mobile / Game Dev: Unity 6, C#, mobile-first architecture, iOS haptics, custom Unity Editor tooling, rewarded-ad integration

Data: pandas, NumPy, Matplotlib, data analysis, A/B testing, production smoke testing, quality gates

AI / LLMs: OpenAI API, Claude/Codex workflows, Gemini API, LangChain, RAG, Pinecone, prompt engineering, tool calling, AI agents, RLHF-style evaluation

Frontend / 3D / CV: React, Vite, Tailwind CSS, Three.js, React Three Fiber, WebGL/GLSL, MediaPipe Hands, Flutter

Infra / DevOps: Docker, Linux VPS, systemd, launchd, SSH tunnels, Vercel, Railway, Git, GitHub, CI/CD, AWS EC2/S3

SELECTED PRODUCTS & SYSTEMS

What Was Drawn - Gesture-Based AI Oracle Card Platform

Jan - Apr 2026 | Sole Developer | Live (web) + iOS App Store submission

React, Vite, Tailwind CSS, MediaPipe Hands, FastAPI, OpenAI API, LangChain, Pinecone, Docker, Vercel, Railway, iOS | whatwasdrawn.com

- Designed, built, and deployed a full-stack RAG web app where users draw cards through real-time webcam hand tracking, with a tap-based mobile fallback.
- Integrated OpenAI generation with LangChain orchestration and Pinecone vector retrieval for personalised readings grounded in card data.
- Containerised the FastAPI backend for Railway and deployed the React frontend to Vercel with a custom domain, rate limiting, monetisation hooks, and production smoke checks.
- Extended to a native iOS app, taken through the full Apple build, TestFlight, and App Store submission process (in final review).

Ninja Butler / Ninja Clan HQ - Multi-Agent Personal OS

Aug 2025 - Present | Sole Developer / Operator

Python, Hermes agent framework (migrated from OpenClaw), Discord, Telegram Bot API, Notion API, Todoist, Postiz, systemd, Hetzner Linux VPS, OAuth-based routing across Claude and Codex

- Built and operate a self-hosted AI control plane on the Hermes agent framework (migrated from OpenClaw), spanning Discord, Telegram, Notion, Todoist, memory, project routing, daily priorities, autonomous content publishing via Postiz, and background build queues.
- Maintained production services on a Hetzner VPS with systemd, launchd-managed SSH tunnels, structured service logs, cross-agent state handoffs (via shared changelog file), and reversible config changes.
- Standardised model routing around task, cost, and latency: Codex for high-volume automation and Claude for reasoning-heavy planning, both via OAuth-based access.

LandLIT - WhatsApp-Native PropTech Automation

Mar 2026 - Present | Sole Developer

Next.js 15, TypeScript, Supabase, PostgreSQL, Twilio WhatsApp API, OpenAI API, Stripe-ready, Vercel

- Built property-management automation workflows for rent reminders, lease-expiry alerts, WhatsApp delivery, and dynamic OpenAI-generated tenant communication.
- Implemented Supabase-backed persistence with JSONL fallback and active-store visibility, designed and validated against a real 26-tenant operating context.

Core Memories - Interactive 3D AI Portfolio

Late 2025 - Q1 2026 | Sole Developer | Live at unicebondoc.com

React 19, Three.js, React Three Fiber, WebGL, GLSL, TypeScript, OpenAI API, Node.js | unicebondoc.com

- Built an immersive 3D portfolio with animated memory orbs, particles, GLSL shader effects, and a portfolio-aware OpenAI chatbot.
- Maintains the public resume, project proof points, interactive storytelling, and AI-assisted visitor Q&A in a single deployable site.

Boba Rush - Unity Casual Mobile Game (iOS-Targeted, Pre-Launch)

Apr 2026 - Present | Sole Developer | In active development

Unity 6 (6000.4.5f1), C#, mobile-first architecture, iOS haptics, rewarded ads, analytics event pipeline, custom Unity Editor tooling

- Architected a tap-based bubble-tea casual game with timed rounds, customer-patience mechanics, combo scoring, speed bonuses, and a rewarded-ad "save order" flow.
- Implemented full game systems end-to-end: customer queue, recipe data models, ingredient logic, unlock progression, analytics event tracking, iOS-specific haptic feedback, and safe-area handling for modern mobile screens.
- Authored custom Unity Editor tools (recipe generator, scene builder) to accelerate content creation and iteration.

EXPERIENCE

Independent AI Engineer (Sole Trader) - Solo founder, multi-product portfolio

Mar 2026 - Present | Sydney, Remote

- Operate as a registered sole trader after completing Master ICT (High Distinction, WSU, July 2025), focused on building and selling AI + mobile products end-to-end.
- Design, build, and deploy products across What Was Drawn, Ninja Butler / Ninja Clan HQ, LandLIT, Core Memories, and Boba Rush (Unity mobile game).
- Onboarded with Alignerr (Labelbox) and Outlier as a human-evaluation contractor (qualification / first-task stage).

Software Engineer - UNIKRE Trading (WSU Capstone Engagement)

Nov 2024 - Jan 2025 | Sydney

- Capstone-linked engagement applying WSU postgraduate research on LLMs for e-commerce content generation against a live Shopify storefront, implementing GPT-4 content strategies in production.
- Ran applied A/B analysis where AI-generated content drove 165% more page views and 82% longer time on page, while human copy generated stronger purchase intent.

SME Account & Loan Operations Manager - RCBC

Sep 2019 - Sep 2022 | Philippines

- Managed end-to-end operations for 100+ concurrent SME client accounts, coordinating relationship managers, compliance teams, documentation, and external stakeholders under regulatory requirements.

EDUCATION

Master of Information and Communications Technology - Western Sydney University

Jul 2023 - Jul 2025

- High Distinction (88/100) on Postgraduate Project A — research project: LLMs for E-Commerce Content Generation.
- Team Lead - Gachabit: led a 4-person team building a Flutter/Dart gamified habit tracker.
- Team Lead - AnyLogic Business Simulation: coordinated modelling, analysis, task allocation, and final delivery.

Professional Year (ICT), ACS Accredited - Performance Education

Sep 2025 - Oct 2026

Bachelor of Communication (Broadcasting) - Bicol University

Jun 2012 - May 2016

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Cloud Foundations - Amazon Web Services, Jun 2025
- ICT Professional Year Program (ACS Accredited) - Performance Education, Sep 2025 - Oct 2026
