

UNICE BONDOC

AI Engineer | Full-Stack AI Developer | LLM & Agent Systems

0492 918 530 | uniceabondoc@gmail.com | Sydney, NSW | Full Work Rights (485 Visa, valid Nov 2027)

[linkedin.com/in/unicebondoc](https://www.linkedin.com/in/unicebondoc) | unicebondoc.com | github.com/unicebondoc

SUMMARY

AI Engineer with a Master of ICT (High Distinction, WSU) and 4 live-deployed products spanning RAG pipelines, agentic systems, workflow automation, and computer vision — built and shipped end-to-end, not just prototyped. Former banking ops manager turned engineer: brings process thinking, stakeholder communication, and real-world problem framing to every technical build.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3, SQL

AI & LLMs: Generative AI, OpenAI API (GPT-4o), Gemini API, LLaMA (Ollama), LangChain, Retrieval-Augmented Generation (RAG), Pinecone, Vector Databases, Prompt Engineering, AI Agents, Tool Calling, Agentic Workflows

Frameworks: React 18, Flutter, Three.js, React Three Fiber, WebGL/GLSL, Node.js, FastAPI, Vite, Tailwind CSS, MediaPipe Hands

Deployment & Tools: Docker, Linux (CLI), Vercel, Railway, Git, GitHub, REST APIs, API Integration, CI/CD, Production Deployment, VS Code, Cursor AI, AWS (EC2, S3), Azure AI (AI-900), n8n, Supabase, Twilio, Agile

Data Science & Libraries: Pandas, NumPy, Matplotlib, Data Analysis, A/B Testing

PROJECT PORTFOLIO

LandLIT — *AI-Powered Tenant Management Automation System*

Stack: n8n, Supabase, Twilio WhatsApp API, OpenAI API, PostgreSQL

github.com/unicebondoc/landlit

- Designed and built an end-to-end workflow automation system for a real property management business, replacing manual tenant communication with automated rent reminders and lease expiry alerts via WhatsApp using n8n, Supabase, and Twilio.
- Architected multi-workflow pipelines in n8n with Supabase (PostgreSQL) as the data layer; integrated OpenAI for dynamic message generation and Twilio WhatsApp API for delivery across 26 tenants, with rent reminder and lease expiry workflows in active production use.

What Was Drawn — *Gesture-Based AI Oracle Card Platform*

Stack: React, Vite, Tailwind CSS, MediaPipe Hands, FastAPI, OpenAI API, LangChain, Pinecone, Docker, Vercel, Railway

whatwasdrawn.com | github.com/unicebondoc/whatwasdrawn

- Designed, built, and deployed a full-stack gesture-controlled oracle card web app where users draw cards using real-time hand tracking via webcam, with a tap-based mobile fallback for devices without camera access.
- Integrated OpenAI API for personalised reading generation, LangChain for embedding and retrieval workflow, and Pinecone for vector-based card retrieval through a full Retrieval-Augmented Generation (RAG) pipeline.
- Containerised FastAPI backend with Docker, deployed to Railway; React frontend deployed to Vercel with custom domain; includes per-IP rate limiting and Ko-fi reading-limit monetisation — maintaining 0% error rate in production since launch.

Ninja Butler — *Personal AI Assistant Agent*

Stack: Python, OpenClaw, MiniMax Text 2.7 (via Ollama), Telegram Bot API, Notion API, TickTick API

github.com/unicebondoc/ninja-butler

- Built a conversational AI personal assistant on Telegram using OpenClaw as the agent framework, enabling natural-language task management, diary entries, calendar reminders, daily briefings, weather lookups, web search, and GitHub queries.

- Deployed on a self-hosted Linux server (Zorin OS) at \$0/month infrastructure cost, running continuously via systemd since March 2026; benchmarked MiniMax Text 2.7 against Qwen 2.5 and GPT-4o-mini, selecting MiniMax for superior speed and cost efficiency; persistent memory managed via OpenClaw’s native backend.

Core Memories — *Interactive 3D AI Portfolio*

Stack: React 18, Three.js, React Three Fiber, WebGL, GLSL, TypeScript, OpenAI API, Node.js

unicebondoc.com | github.com/unicebondoc/unice-portfolio

- Built and deployed a 3D interactive web portfolio featuring a bioluminescent forest environment with animated WebGL memory orbs, particle systems, and GLSL shader effects; integrated an OpenAI-powered chatbot for real-time interaction with portfolio content.

EXPERIENCE

AI Training & Evaluation Specialist (Contract)

Mar 2026 – Present

Alignerr — Remote

- Contract role performing RLHF-style evaluation of large language model outputs for leading AI labs — covering code generation, reasoning accuracy, and response quality assessment.

Software Engineer

Nov 2024 – Jan 2025

UNIKRE Trading — Sydney, Australia

- Maintained and updated a live Shopify e-commerce storefront, implementing AI-generated content strategies using GPT-4 as applied research into LLM effectiveness — contributing directly to the Masters capstone study (High Distinction, 88/100).

SME Account & Loan Operations Manager

Sep 2019 – Sep 2022

Rizal Commercial Banking Corporation — Philippines

- Managed end-to-end operations for 100+ concurrent SME client accounts, coordinating relationship managers, compliance teams, and external stakeholders under regulatory requirements.

EDUCATION

Master of Information and Communications Technology (Web & Mobile Computing)

Jul 2023 – Jul 2025

Western Sydney University, Sydney

High Distinction (88/100) — Postgraduate Project A (Capstone): LLMs for E-Commerce Content Generation

- Team Lead — Gachabit (Flutter): Led a 4-person team to design and ship a gamified habit tracker mobile app using Flutter and Dart; owned majority of full-stack development and final presentation.
- Team Lead — AnyLogic Business Simulation: Led a 4-person team modelling real-world business operations, coordinating task allocation, data analysis, and presentation delivery.

Bachelor of Communication (Broadcasting)

Jun 2012 – May 2016

Bicol University, Philippines

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Cloud Foundations — Amazon Web Services, Jun 2025
- Microsoft Azure AI Fundamentals (AI-900) — In Progress
- ICT Professional Year Program (ACS Accredited) — Performance Education, Sep 2025 – Oct 2026
