

UNICE BONDOC

AI Engineer | Full-Stack AI Developer | LLM & Agent Systems

0492 918 530 | uniceabondoc@gmail.com | Sydney, NSW

linkedin.com/in/unicebondoc | unicebondoc.com | github.com/unicebondoc

SUMMARY

AI Engineer with a Master of ICT (High Distinction, WSU) who builds and ships live AI products — not just prototypes. Career-switcher from banking operations bringing technical depth, real stakeholder experience, and proven team leadership across multiple group projects. Shipped a gesture-controlled AI platform with a full RAG pipeline, a self-hosted AI agent with agentic tool routing, and a 3D WebGL portfolio powered by OpenAI. Backed by published research on LLM effectiveness in e-commerce.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3, SQL

AI & LLMs: Generative AI, OpenAI API (GPT-4o), Gemini API, LLaMA (Ollama), LangChain, Retrieval-Augmented Generation (RAG), Pinecone, Vector Databases, Prompt Engineering, AI Agents, Tool Calling, Agentic Workflows

Computer Vision: MediaPipe Hands, Gesture Recognition

Frameworks: React 18, Flutter, Three.js, React Three Fiber, WebGL/GLSL, Node.js, FastAPI, Vite, Tailwind CSS

Deployment & Tools: Docker, Linux (CLI), Vercel, Railway, Git, GitHub, REST APIs, API Integration, CI/CD, Production Deployment, VS Code, Cursor AI, AWS (EC2, S3), Azure AI (AI-900), Agile

Data Science & Libraries: Pandas, NumPy, Matplotlib, Data Analysis, A/B Testing

PROJECT PORTFOLIO

What Was Drawn — *Gesture-Based AI Oracle Card Platform*

Stack: React, Vite, Tailwind CSS, MediaPipe Hands, FastAPI, OpenAI API, LangChain, Pinecone, Docker, Vercel, Railway

whatwasdrawn.com | github.com/unicebondoc/whatwasdrawn

- Designed, built, and deployed a full-stack gesture-controlled oracle card web app where users draw cards using real-time hand tracking via webcam, with a tap-based mobile fallback for devices without camera access.
- Integrated OpenAI API for personalised reading generation, LangChain for embedding and retrieval workflow, and Pinecone for vector-based card retrieval through a full Retrieval-Augmented Generation (RAG) pipeline.
- Containerised FastAPI backend with Docker, deployed to Railway; React frontend deployed to Vercel with custom domain; includes per-IP rate limiting and Ko-fi reading-limit monetisation.

Ninja Butler — *Personal AI Assistant Agent*

Stack: Python, OpenClaw, MiniMax Text 2.7 (via Ollama), Telegram Bot API, Notion API, TickTick API

github.com/unicebondoc/ninja-butler

- Built a conversational AI personal assistant on Telegram using OpenClaw as the agent framework, enabling natural-language task management, diary entries, calendar reminders, daily briefings, weather lookups, web search, and GitHub queries.
- Deployed on a self-hosted Linux server (Zorin OS); benchmarked MiniMax Text 2.7 against Qwen 2.5 and GPT-4o-mini, selecting MiniMax for superior speed and cost efficiency; persistent memory managed via OpenClaw's native backend.
- Integrated Notion sync and TickTick task management as callable tools through a unified agent framework, running continuously as a systemd service.

Core Memories — *Interactive 3D AI Portfolio*

Stack: React 18, Three.js, React Three Fiber, WebGL, GLSL, TypeScript, OpenAI API, Node.js

unicebondoc.com | github.com/unicebondoc/unice-portfolio

- Built and deployed a 3D interactive web application featuring a bioluminescent forest environment with animated WebGL memory orbs, particle systems, and GLSL shader effects.

- Integrated an OpenAI-powered chatbot enabling real-time interaction with portfolio content, with mobile-responsive design and ambient audio.

LLMs for E-Commerce Content Generation — *WSU Research*

Stack: Python, OpenAI API (GPT-4), Shopify Liquid, REST APIs, Voiceflow, pandas, numpy, matplotlib

github.com/unicebondoc/llm-ecommerce-analysis

- Conducted sequential A/B testing on a live Shopify platform comparing ChatGPT-generated vs human-generated content — AI drove 165% more page views and 82% longer time on page; human content generated 2x higher purchase intent. Sole researcher and technical implementer. Awarded High Distinction (88/100).

EXPERIENCE

AI Training & Evaluation Specialist (Contract)

Mar 2026 – Present

Alignerr — Remote

- Contract role evaluating and improving large language model outputs for leading AI labs — covering code generation, reasoning accuracy, and response quality assessment.

Software Engineer

Nov 2024 – Jan 2025

UNIKRE Trading — Sydney, Australia

- Maintained and updated product listings, promotional content, and storefront copy on a live Shopify e-commerce platform, ensuring accuracy and consistency across all customer-facing pages.
- Implemented on-page SEO improvements including meta titles, meta descriptions, and page structure optimisation, improving organic search visibility and indexing across a 500-product catalogue.
- Applied AI-generated content strategies using ChatGPT (GPT-4) to the storefront as part of applied research into LLM effectiveness for e-commerce — contributing directly to the Masters capstone study (High Distinction, 88/100).
- Collaborated remotely with the business owner to scope and prioritise web improvements, communicating technical recommendations to a non-technical stakeholder in a real commercial context.

SME Account & Loan Operations Manager

Sep 2019 – Sep 2022

Rizal Commercial Banking Corporation — Philippines

- Managed end-to-end operations for 100+ concurrent SME client accounts, coordinating relationship managers, compliance teams, and external stakeholders under regulatory requirements.
- Delivered client-facing consultations and issue resolution for SME business owners, managing cross-functional communication across banking operations.

EDUCATION

Master of Information and Communications Technology (Web & Mobile Computing)

Jul 2023 – Jul 2025

Western Sydney University, Sydney

High Distinction (88/100) — Postgraduate Project A (Capstone): LLMs for E-Commerce Content Generation

- Team Lead — Gachabit (Flutter): Led a 4-person team to design and build a gamified habit tracker mobile app using Flutter and Dart; assigned tasks across the team, ran regular standups via Microsoft Teams, owned the majority of the full-stack development, and delivered the final presentation.
- Team Lead — AnyLogic Business Simulation: Led a 4-person team modelling and simulating real-world business operations using AnyLogic, coordinating task allocation, data analysis, and final presentation delivery.

Bachelor of Communication (Broadcasting)

Jun 2012 – May 2016

Bicol University, Philippines

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Cloud Foundations — Amazon Web Services, Jun 2025
- Microsoft Azure AI Fundamentals (AI-900) — In Progress (exam scheduled)
- ICT Professional Year Program (ACS Accredited) — Performance Education, Sep 2025 – Oct 2026
