

UNICE BONDOC

AI Engineer | Mobile & Full-Stack Developer | LLM, Agent & Game Systems

Sydney, NSW | Full Work Rights | 0492 918 530 | uniceabondoc@gmail.com
linkedin.com/in/unicebondoc | github.com/unicebondoc | unicebondoc.com

SUMMARY

AI engineer and product builder with a Master of ICT from Western Sydney University (High Distinction capstone: LLMs for E-Commerce Content Generation) and an end-to-end portfolio across RAG, computer vision, agent orchestration, 3D commerce, self-hosted infrastructure, and Unity mobile development. Ships live customer experiences through UNIKRE and What Was Drawn, operates the private Ninja Clan agent system, and tests Boba Rush through iOS TestFlight as a registered sole trader. Former banking operations manager for 100+ SME accounts, bringing stakeholder discipline and operational rigour into technical builds.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, SQL, Dart, HTML5, CSS3	AI / LLMs: OpenAI API, Claude/Codex workflows, Gemini API, LangChain, RAG, Pinecone, prompt engineering, tool calling, AI agents, RLHF-style evaluation
Backend / Automation: FastAPI, Node.js, n8n, Supabase, PostgreSQL, Twilio WhatsApp, Telegram bots, Gmail/Calendar/TickTick integrations, REST APIs	Frontend / 3D / CV: React, Vite, Tailwind CSS, Three.js, React Three Fiber, WebGL/GLSL, MediaPipe Hands, Flutter
Mobile / Game Dev: Unity 6, C#, mobile-first architecture, iOS haptics, custom Unity Editor tooling, rewarded-ad integration	Infra / DevOps: Docker, Linux, Hetzner VPS, systemd, launchd, SSH tunnels, Vercel, Railway, GitHub Actions, CI/CD, AWS EC2/S3
Data: pandas, NumPy, Matplotlib, data analysis, A/B testing, production smoke testing, quality gates	

SELECTED PRODUCTS & SYSTEMS

What Was Drawn - Gesture-Based AI Oracle Card Platform <i>React, Vite, Tailwind CSS, MediaPipe Hands, FastAPI, OpenAI API, LangChain, Pinecone, Docker, Vercel, Railway, iOS whatwasdrawn.com</i> - Designed, built, and deployed a full-stack RAG web app where users draw cards through real-time webcam hand tracking, with a tap-based mobile fallback. - Integrated OpenAI generation with LangChain orchestration and Pinecone vector retrieval for personalised readings grounded in card data. - Containerised the FastAPI backend for Railway and deployed the React frontend to Vercel with a custom domain, rate limiting, monetisation hooks, and production smoke checks. - Extended the product toward a native iOS experience while keeping the production web application and mobile tap fallback available today.	Jan 2026 - Present Sole Developer Web live, native iOS upcoming
UNIKRE - Quiet Whiskers Brand & 3D Commerce Experience <i>Next.js, React, TypeScript, React Three Fiber, Three.js, Framer Motion, Vercel, analytics, marketplace integrations</i> - Built the live brand and commerce home for The Quiet Whiskers Oracle, connecting a physical 44-card deck and guidebook to the What Was Drawn digital reading experience. - Created a cinematic product journey using interactive 3D, motion, real product imagery, analytics, and direct marketplace purchase paths.	2024 - Present Product Builder Live at unikre.com.au
Ninja Clan - Private Multi-Agent Operating System <i>Python, OpenClaw to Hermes migration, Linux, Hetzner VPS, systemd, Telegram, Gmail, Google Calendar, TickTick, curated memory, Claude/Codex OAuth routing</i> - Started Ninja Butler on OpenClaw using a repurposed iMac converted to Linux as the first private, always-available home for Telegram-based assistance and automation. - Migrated the runtime to a Hetzner Linux VPS for reliable 24/7 operation, introducing systemd services, persistent logs, SSH boundaries, remote access, and reversible configuration. - Transitioned from OpenClaw to Hermes and expanded Butler into Ninja Clan: specialised agents connecting Telegram, Gmail, Calendar, TickTick, curated memory, research, and Mac build workers through human approval gates.	Aug 2025 - Present Sole Developer / Operator
LandLIT - WhatsApp-Native PropTech Automation <i>Next.js 15, TypeScript, Supabase, PostgreSQL, Twilio WhatsApp API, OpenAI API, Stripe-ready, Vercel</i> - Built property-management automation workflows for rent reminders, lease-expiry alerts, WhatsApp delivery, and dynamic OpenAI-generated tenant communication. - Implemented Supabase-backed persistence with JSONL fallback and active-store visibility as an active-development PropTech product.	Mar 2026 - Present Sole Developer

Core Memories - Interactive 3D AI Portfolio

Late 2025 - Q1 2026 | Sole Developer | Live at unicebondoc.com

React 19, Three.js, React Three Fiber, WebGL, GLSL, TypeScript, OpenAI API, Node.js | unicebondoc.com

- Built an immersive 3D portfolio with animated memory orbs, particles, GLSL shader effects, and a portfolio-aware OpenAI chatbot.
- Maintains the public resume, project proof points, interactive storytelling, and AI-assisted visitor Q&A in a single deployable site.

Boba Rush - Unity Casual Mobile Game

Apr 2026 - Present | Sole Developer | iOS TestFlight

Unity 6 (6000.4.5f1), C#, mobile-first architecture, iOS haptics, rewarded ads, analytics event pipeline, custom Unity Editor tooling

- Architected a tap-based bubble-tea casual game with timed rounds, customer-patience mechanics, combo scoring, speed bonuses, and a rewarded-ad "save order" flow.
- Implemented full game systems end-to-end: customer queue, recipe data models, ingredient logic, unlock progression, analytics event tracking, iOS-specific haptic feedback, and safe-area handling for modern mobile screens.
- Authored custom Unity Editor tools (recipe generator, scene builder) to accelerate content creation and iteration.

EXPERIENCE

Independent AI Engineer (Sole Trader) - Solo founder, multi-product portfolio

Mar 2026 - Present | Sydney, Remote

- Operate as a registered sole trader after completing Master ICT (High Distinction, WSU, July 2025), focused on building and selling AI and mobile products end-to-end.
- Design, build, deploy, and maintain UNIKRE, What Was Drawn, Ninja Clan, LandLIT, Core Memories, and Boba Rush across web, private infrastructure, and iOS.
- Own the full product lifecycle: research, interaction design, architecture, implementation, deployment, analytics, evaluation, and iterative release.

Software Engineer - UNIKRE Trading (WSU Capstone Engagement)

Nov 2024 - Jan 2025 | Sydney

- Capstone-linked engagement applying WSU postgraduate research on LLMs for e-commerce content generation against a live Shopify storefront, implementing GPT-4 content strategies in production.
- Ran applied A/B analysis where AI-generated content drove 165% more page views and 82% longer time on page, while human copy generated stronger purchase intent.

SME Account & Loan Operations Manager - RCBC

Sep 2019 - Sep 2022 | Philippines

- Managed end-to-end operations for 100+ concurrent SME client accounts, coordinating relationship managers, compliance teams, documentation, and external stakeholders under regulatory requirements.

EDUCATION

Master of Information and Communications Technology - Western Sydney University

Jul 2023 - Jul 2025

- High Distinction (88/100) on Postgraduate Project A — research project: LLMs for E-Commerce Content Generation.
- Team Lead - Gachabit: led a 4-person team building a Flutter/Dart gamified habit tracker.
- Team Lead - AnyLogic Business Simulation: coordinated modelling, analysis, task allocation, and final delivery.

Professional Year (ICT), ACS Accredited - Performance Education

Jul 2026 - Oct 2026

Bachelor of Communication (Broadcasting) - Bicol University

Jun 2012 - May 2016

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Cloud Foundations - Amazon Web Services, Jun 2025
- ICT Professional Year Program (ACS Accredited) - Performance Education, Jul 2026 - Oct 2026
