

UNICE BONDOC

AI Engineer | Full-Stack AI Developer | LLM & Agent Systems

0492 918 530 | uniceabondoc@gmail.com | Sydney, NSW

linkedin.com/in/unicebondoc | unicebondoc.com | github.com/unicebondoc

SUMMARY

AI Engineer specialising in LLM integration, AI agents, and full-stack product development. Built and deployed multiple live systems, including a gesture-based oracle platform using RAG, a Telegram AI assistant with tool routing and persistent memory, and a 3D WebGL portfolio with an OpenAI chatbot. Master of ICT graduate from Western Sydney University with a High Distinction (88/100) in postgraduate research on LLMs for e-commerce.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

AI & LLMs: OpenAI API (GPT-4), Gemini API, LLaMA/Qwen (local via Ollama), LangChain, RAG, Pinecone, Prompt Engineering, AI Agents, Tool Calling

Frameworks: React 18, Three.js, React Three Fiber, WebGL/GLSL, Node.js, FastAPI, Vite, Tailwind CSS

Computer Vision: MediaPipe Hands, real-time gesture recognition, hand landmark detection

Deployment & Tools: Docker, Vercel, Railway, Supabase, Git, GitHub, REST APIs, Telegram Bot API, VS Code, Cursor AI IDE, Claude Code (CLI agent)

Cloud: AWS Cloud Foundations (EC2, S3 concepts), Azure AI Fundamentals (AI-900, certification in progress)

Data Science & Libraries: Pandas, numpy, matplotlib

PROJECT PORTFOLIO

What Was Drawn — Gesture-Based AI Oracle Card Platform

Stack: React, Vite, Tailwind CSS, MediaPipe Hands, FastAPI, OpenAI API, LangChain, Pinecone, Docker, Vercel, Railway

whatwasdrawn.com | github.com/unicebondoc/whatwasdrawn

- Designed, built, and deployed a full-stack gesture-controlled oracle card web app where users draw cards using real-time hand tracking via webcam, with a tap-based mobile fallback for devices without camera access.
- Integrated OpenAI API for personalised reading generation, LangChain for embedding and retrieval workflow, and Pinecone for vector-based card retrieval through a full Retrieval-Augmented Generation (RAG) pipeline.
- Containerised FastAPI backend with Docker, deployed to Railway; React frontend deployed to Vercel with custom domain; includes per-IP rate limiting and Ko-fi reading-limit monetisation.

Ninja Butler — AI Personal Assistant (Active Development)

Stack: Python, OpenAI API, Supabase, Telegram Bot API, OpenClaw, LLaMA, Qwen (Ollama), Notion API, TickTick API

github.com/unicebondoc/ninja-butler

- Building a conversational AI personal assistant on Telegram using OpenClaw as the agent framework, enabling natural-language task management, diary entries, calendar reminders, daily briefings, weather lookups, web search, and GitHub queries.
- Engineered dual-mode LLM inference: cloud-based (OpenAI) and locally deployed (LLaMA, Qwen via Ollama) for private, offline-capable AI execution, with Supabase for persistent user memory across sessions.
- Integrated Notion sync and TickTick task management as callable tools through a unified agent framework, with ongoing work toward broader productisation.

Core Memories — Interactive 3D AI Portfolio

Stack: React 18, Three.js, React Three Fiber, WebGL, GLSL, TypeScript, OpenAI API, Node.js

unicebondoc.com

- Built and deployed a 3D interactive web application featuring a bioluminescent forest environment with animated WebGL memory orbs, particle systems, and GLSL shader effects.
- Integrated an OpenAI-powered chatbot enabling real-time interaction with portfolio content, with mobile-responsive design and ambient audio.

LLMs for E-Commerce Content Generation — WSU Research

Stack: Python, OpenAI API (GPT-4), Shopify Liquid, REST APIs, Voiceflow, pandas, numpy, matplotlib

github.com/unicebondoc/llm-ecommerce-analysis

- Conducted A/B testing research on a live Shopify platform comparing AI-generated vs human-generated content — AI content drove 165% more page views and 82% longer time on page, while human content generated 2x higher purchase intent. Awarded High Distinction (88/100).
- Engineered a full-stack Shopify prototype with a custom GPT-4-powered AI chatbot (Voiceflow) as an individual Masters capstone at Western Sydney University.

EXPERIENCE

AI Software Engineer

Jun 2024 – Present

UNIKRE Trading — Sydney, Australia

- Served as the lead developer for a small e-commerce business, building the Shopify storefront from scratch including Liquid theme customisation, RESTful API integration, product catalogue setup, and checkout flow.
- Designed and deployed an AI-powered customer service chatbot using Python, OpenAI API (GPT-4), and Voiceflow — independently scoping requirements and owning full delivery.
- Evaluated multiple LLM providers including GPT-4, Claude, Gemini, and LLaMA to assess response quality and cost-effectiveness for AI-assisted customer workflows.
- Currently developing AI-powered digital products and maintaining the business's web presence, applying full-stack AI engineering skills in a real commercial context.

SME Account & Loan Operations Manager

Sep 2019 – Sep 2022

Rizal Commercial Banking Corporation — Philippines

- Managed end-to-end account operations for 100+ concurrent SME client accounts, coordinating relationship managers, compliance teams, and external stakeholders under regulatory requirements.
- Provided direct client-facing consultations and issue resolution for SME business owners, managing cross-functional communication across banking operations.

EDUCATION

Master of Information and Communications Technology (Web & Mobile Computing)

Jul 2023 – Jul 2025

Western Sydney University, Sydney

High Distinction (88/100) — Postgraduate Project A (Capstone): LLMs for E-Commerce Content Generation

Key Subjects: IT Project Management, Cloud Computing, Applied Cybersecurity, Web Technologies, Mobile Computing

Bachelor of Communication (Broadcasting)

Jun 2012 – May 2016

Bicol University, Philippines

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

-
- AWS Cloud Foundations — Amazon Web Services, Jun 2025
 - Microsoft Azure AI Fundamentals (AI-900) — In Progress (exam scheduled)
 - ICT Professional Year Program (ACS Accredited) — Performance Education, Sep 2025 – Oct 2026
